

# Strategic Growth Through AI

EPC Real Estate Group

Leveraging Generative AI to Scale a **\$1.5B Development Platform** Beyond  
Kansas City

PREPARED BY CHIEF AI OFFICER

CONFIDENTIAL

# EPC Real Estate Group at a Glance

## \$1.5B

### Capital Deployed

Cumulative across all projects since founding

## 10K+

### Residential Units

Delivered or under management

## 1.15M

### SF Commercial

Commercial and industrial space

## \$12M

### Annual Revenue

Estimated operating revenue (midpoint)

### Founded & Leadership

Founded 1999–2001 as ePartment Communities, rebranded 2014 under CEO **Michael J. McKeen**. Private partnership with Terence P. O'Leary (Chairman) and Brendon O'Leary (EVP & Partner). HQ in Overland Park, Kansas — 2024 Chamber Business Hall of Honor inductee.

### Geographic Footprint & Differentiators

Operations span KC metro, Wichita, Topeka, Salt Lake City, Denton TX, and Flagstaff AZ. Key strengths: **EPCLiving** lifestyle brand, public-private partnership expertise (\$11.3M TIF secured), vertical integration across development, management, and investment, and 9 OEM franchise categories.

# Revenue Planning Envelope

## Revenue Estimation from Multiple Sources

| Source             | Estimate      | Confidence |
|--------------------|---------------|------------|
| RocketReach (2025) | \$11.8M       | Medium     |
| CIENCE             | "\$1B+"       | Erroneous  |
| SignalHire         | "<\$1M"       | Erroneous  |
| ZoomInfo           | Not disclosed | —          |

📄 **Selected Modeling Midpoint: \$12M** annual operating revenue. Range: \$8M–\$20M based on comparable KC firms. EPC manages 16 communities comprising 2,976 units plus earns development and asset management fees — economic footprint far exceeds P&L revenue.

## The PropTech Opportunity Window Is Now

**\$16.7B**

PropTech VC investment in 2025 — up **67.9% YoY**

**42%**

Annualized growth rate for AI-centered proptech companies

**\$2.2B**

Valuation reached by EliseAI — the AI leasing benchmark

# Current Technology Infrastructure

## Confirmed Technology Stack

### Entrata PMS

Leasing, resident mgmt, accounting, marketing, maintenance across 16 communities

### EOS

Entrepreneurial Operating System — structured operational rhythms ideal for AI KPI integration

### Microsoft 365

Core productivity suite with Cloudflare CDN, WordPress, Google Tag Manager, Issuu

### Investor Portal

Custom LP/investor communications platform — prime candidate for AI enhancement

## Gap Analysis — Where AI Must Fill the Void

Notably absent from EPC's stack are enterprise CRM platforms (Salesforce, HubSpot), dedicated construction project management tools (Procore, Buildertrend), advanced analytics platforms, and any AI-enabled tools. Job postings focus on property management — not technology roles.

- ❏ **Strategic AI Foundation:** Entrata provides a solid data backbone with resident, leasing, and financial data across 2,976 units. EOS creates structured rhythms ideal for AI-driven KPIs. EPC emphasizes smart technology in newer projects (The Oslo) but corporate AI adoption lags institutional competitors. The gap is the opportunity.

# Active Development Pipeline — \$400M+ Identified

1

## **Wichita Ballpark District — \$110M**

165-room Unscripted hotel, 180 luxury apartments, 260-stall garage, 10,000 SF retail

2

## **74 Broadway "Oberon" — \$90.3M**

280 units + ground-floor retail in Waldo, KC; Brinkmann Constructors; Port KC incentives

3

## **The Rocks — ~\$75M**

280+ apartments, mixed-use in Roeland Park; DLR Group; groundbreaking Nov 2025

4

## **Sonder KC — \$63M**

213 units; adaptive reuse of 1960s office building blended with new construction

5

## **Third & Grand — ~\$62M**

245 apartments in River Market; 3G Development JV; transit-oriented near KC streetcar

Additional active projects include **Commerce Tower** (355-unit LEED Gold, 100 deposits in first 3 months), **West Bottoms Flats** (265 units from 5 historic manufacturing buildings), **The Fieldston** (206-unit active-adult luxury), and **The OsLo** (wellness-focused multifamily with Ryan Companies). EPC has earned five AAKC "Overall Best Property" Crystal Merit Awards.

# AI-Powered Leasing & Resident Experience Engine

## What It Does

- **24/7 AI Leasing Agents**  
Deploy EliseAI or custom AI across all 16 communities for prospect engagement, appointment scheduling, and lease application assistance
- **Dynamic Pricing Optimization**  
AI-driven rent pricing across 2,976 units using real-time market data, competitor rates, and demand signals
- **Predictive Retention Models**  
Identify at-risk residents 60–90 days before lease expiration and trigger automated re-engagement campaigns

## Quantified Annual Impact

|                                                                                          |                                                                                |
|------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| <b>\$240K–\$480K</b><br>Dynamic pricing NOI uplift (2–4% improvement)                    | <b>\$180K–\$300K</b><br>Leasing efficiency gains (30–40% staff time reduction) |
| <b>\$520K–\$780K</b><br>Retention improvement (5% turnover reduction × \$3,500 avg cost) |                                                                                |

**TOTAL LEVER VALUE: \$940K–\$1.56M annually**

EliseAI reports 3x lead-to-lease conversion improvement.  
NMHC: 72% of renters prefer digital-first experiences; AI communities fill vacancies 35% faster.

# Development Underwriting & Deal Intelligence Co-Pilot

## Quantified Annual Impact

**\$360K–\$600K**

Underwriting acceleration — 40% faster deal evaluation, 2–3x deal throughput without added headcount

**\$500K–\$1.0M**

Public incentive optimization — 15–20% higher TIF/grant capture rate on active pipeline

**\$120K–\$200K**

Document review automation — 50–60% reduction in legal review time

**TOTAL LEVER VALUE: \$980K–\$1.8M annually**

## What It Does

- **AI Underwriting Engine:** Ingests market data, comps, zoning records, demographics, and cost indices to generate pro formas in hours instead of weeks
- **Competitive Landscape AI:** Automates new-market analysis for SLC, Texas, and Arizona using census, permit, and market databases
- **AI Document Review:** Lease abstraction, partnership agreements, and public incentive applications (TIF, Opportunity Zones, HUD)
- **Predictive Cost Models:** Timeline and cost estimation using historical EPC data across 10,000+ units

📄 Deloitte: AI-driven underwriting reduces analysis time 60–80% and improves accuracy 25–35%. CBRE: AI cuts site selection from 8–12 weeks to 2–3 weeks.

# Predictive Maintenance & Asset Optimization Platform

## IoT Predictive Maintenance

Deploy sensors across 2,976 units to identify HVAC, plumbing, and structural issues before they become emergency repairs.

**Saves \$300K–\$420K** annually.

## Computer Vision Inspections

AI-powered property condition assessments during unit turns, reducing inspection time and improving documentation quality.

**\$150K–\$250K** revenue uplift from 30% faster turns.

## AI Energy Management

Optimize utility consumption across all managed communities.

ENERGY STAR estimates 10–30% energy cost reduction. **Saves \$180K–\$300K** annually.

## Vendor & Work Order AI

Automated routing matches maintenance requests to optimal contractors on cost, availability, and quality scores. **Saves**

**\$120K–\$200K** in vendor costs.

- ❑ **TOTAL LEVER VALUE: \$750K–\$1.17M annually.** Gartner: predictive maintenance reduces emergency repairs 25–30% and extends equipment life 20–40%. NAA: AI maintenance platforms achieve 15% higher resident satisfaction and 8% lower turnover.

# Investor Relations & Capital Markets Intelligence

## Transforming the Investor Portal

01

### Automated Investor Reporting

AI generates quarterly reports, distribution calculations, and portfolio performance dashboards directly from Entrata data — reducing 40+ hours of manual prep to 4–6 hours

02

### AI Investor Matching

Identifies optimal LP profiles for each deal type (multifamily, hospitality, senior housing) based on investment criteria, risk tolerance, and track record

03

### AI-Generated Offering Memoranda

Dynamically pulls market data, project specs, and financial projections — reducing OM preparation time by 60%

04

### Portfolio Optimization Models

Predictive models for capital deployment optimization and exit timing across the full portfolio

## Annual Value Breakdown

**\$90K–\$150K**

Reporting automation —  
70% reduction in quarterly  
preparation time

**\$400K–\$800K**

Capital raise acceleration  
— 20% faster deployment  
on \$400M+ pipeline

**\$60K–\$100K**

OM automation — 60% reduction in offering document  
preparation

**TOTAL LEVER VALUE: \$550K–\$1.05M annually**

McKinsey: AI investor relations reduces reporting prep 70–80% and improves capital raise velocity 20–30% for mid-market real estate firms. PitchBook: AI-assisted raising reduces time-to-close 25–35%.

# Construction Oversight & Project Delivery Intelligence

## Drone + Computer Vision

Track milestones, flag quality issues, and monitor progress in real-time across all active projects

## AI Schedule Optimization

Predict weather delays, supply chain disruptions, and labor availability — proactively adjust timelines

## RFI & Change Order AI

NLP-powered routing, prioritization, and resolution of construction queries 50% faster

## Real-Time Cost Tracking

Compares expenditures against pro forma budgets and alerts leadership to variances exceeding thresholds

**☐ TOTAL LEVER VALUE: \$1.1M–\$2.2M annually** — the highest-impact single lever. Schedule acceleration alone (10–15% faster delivery on \$400M+ pipeline) yields \$600K–\$1.2M in earlier revenue recognition. McKinsey: AI boosts construction productivity 50–60% and reduces costs 20%. BCG: AI cost management reduces overruns 10–20%.

# Additional AI Levers — Quick-Win Opportunities

## Marketing & Content

Automated listing descriptions, social content, virtual staging, and targeted digital advertising across all communities

**\$120K–\$240K/yr**

## HR & Talent Acquisition

AI recruiting chatbot, automated onboarding for property managers, retention analytics for the 50–65 person team

**\$80K–\$150K/yr**

## Finance & Accounting

AI invoice processing, automated AP/AR, predictive cash flow modeling for complex capital structures

**\$150K–\$280K/yr**

## Legal & Compliance

AI contract review for partnership agreements, automated regulatory monitoring across HUD, FHA, and multi-jurisdiction compliance

**\$100K–\$180K/yr**

## Community & Amenity

AI analysis of amenity usage, event programming optimization, and resident satisfaction prediction to maximize EPCLiving brand value

**\$80K–\$150K/yr**

Combined quick-win value: **\$530K–\$1.0M annually** — achievable with minimal integration complexity and fast time-to-value.

# Conservative Value Stack — Aggregate AI Impact

## Annual Value by Lever

## The Bottom Line

**\$4.85M–\$8.78M**

Total conservative annual value

**40–73%**

Of \$12M operating revenue

**\$800K–\$1.4M**

Investment required over 24 months

**4–7 Months**

Payback period

**540–880%**

3-Year ROI

📄 Impact on the \$400M+ development pipeline amplifies value by an order of magnitude through faster delivery, reduced overruns, and accelerated capital deployment.

# Rollout Plan – First 30 Days

Five focused fast-win initiatives to establish AI momentum, demonstrate ROI, and build internal governance infrastructure. Total Phase 1 investment: **\$65K–\$125K**. Expected run-rate value: **\$150K–\$300K annually**.

1

## Executive AI Immersion Workshop

Full leadership team – McKeen, O'Leary, Bradley. Live demos of EliseAI, underwriting automation, predictive maintenance. Establish AI governance charter. **\$15K–\$25K**

2

## AI Leasing Pilot (2–3 Communities)

Deploy AI chatbot on highest-traffic properties for 24/7 lead capture and appointment scheduling. A/B test against manual processes. **\$20K–\$40K**. Expected: \$50K–\$100K run-rate within 60 days

3

## Investor Reporting Automation

Automate quarterly investor reports from Entrata data feeds. Reduce 40+ hours of manual prep to 4–6 hours. **\$15K–\$30K**

4

## Data Readiness Assessment

Audit Entrata data quality, identify integration requirements, establish baseline KPIs for all five priority AI levers. **\$10K–\$20K**

5

## AI Governance Framework

Draft acceptable use policy, vendor evaluation criteria, data security standards, and AI Steering Committee charter. **\$5K–\$10K**

# Rollout Plan — 60–90 Days & Governance

## PHASE 2

### Days 31–90 — Scale & Integrate

- Expand AI leasing to all 16 managed communities
- Launch dynamic pricing optimization across the full portfolio
- Deploy predictive maintenance sensors on 3–5 highest-maintenance properties
- Implement AI underwriting models for next 2–3 pipeline deals
- Launch construction oversight AI on The Rocks and 74 Broadway

❏ Phase 2 Investment: **\$250K–\$450K**. Expected run-rate value: **\$1.5M–\$2.8M annually**. Phase 2→3 expansion requires documented 3x ROI from Phase 1–2 pilots.

## PHASE 3

### Months 4–24 — Full Optimization

Enterprise AI platform across all business lines, AI Center of Excellence, geographic expansion intelligence for SLC and Texas, full construction automation, and advanced investor matching.

## AI Governance Framework

|                                                                                                                                                                      |                                                                                                                                                                    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div><b>AI Steering Committee</b><br/><br/>CEO McKeen (sponsor),<br/>EVP Bradley (ops lead),<br/>VP Gordon (asset mgmt),<br/>Controller Kolojay (finance lead)</div> | <div><b>Human-in-the-Loop</b><br/><br/>All AI recommendations on leasing pricing, investor communications, and construction decisions require human approval</div> |
| <div><b>Compliance &amp; Audit</b><br/><br/>Quarterly AI performance reviews, annual third-party audits, SOC 2/ISO 27001 vendor requirements</div>                   | <div><b>Data Security</b><br/><br/>Private cloud deployment for investor and financial data; anonymization protocols for all resident data</div>                   |

# Unlocking Portfolio Value and Scaling Beyond Kansas City with AI

"The window for AI adoption in real estate development and property management is now. EPC Real Estate Group is uniquely positioned — with the data infrastructure, deal pipeline, and operational platform to capture transformational value."
