

CONFIDENTIAL · MARCH 2026

Strategic AI Growth Report

EPC Real Estate Group

Leveraging Generative AI for Operational Excellence & Portfolio Optimization

Prepared by Chief AI Officer

EPC Real Estate Group: Company at a Glance

\$12M	~60	\$1.5B
Operating Revenue	Employees	Capital Deployed
Midpoint estimate; privately held, partnership-based ownership	Corporate staff & property-level community managers across multiple locations	Cumulative; 10,000+ residential units, 1.15M SF commercial/industrial

5

Business Lines

Development, Property
Management,
Acquisitions,
Investment
Management, Strategic
Partnerships

Key Differentiators

- Lifestyle-brand positioning ("EPCLiving") with vertical integration across development, management, and investment
- Public-private partnership expertise – \$11.3M TIF financing secured
- 16 managed communities, 2,976 units; deep Kansas City market embeddedness

Leadership Team

- **Michael J. McKeen** — President, CEO & Owner; Turner Construction veteran, LEED AP
- **Terence P. O'Leary** — Chairman & Founding Partner; Cushman & Wakefield lineage
- **Austin Bradley** — EVP; former HOK
- **Brendon O'Leary** — EVP & Partner

Revenue Planning Envelope

Revenue Estimates by Source

Defensible Revenue Range: \$8–20M. Selected modeling midpoint: **\$12M.** CIENCE's "\$1B+" figure erroneously conflates cumulative capital deployed with operating revenue.

Critical Context

- ❏ Operating revenue represents management fees, development fees, and asset management fees only. The active development pipeline exceeds **\$400M in aggregate project value** — EPC's economic footprint far exceeds its P&L revenue.

Industry Benchmarks

- Multifamily developers: **15–25% EBITDA margins** on fee income
- PropTech VC investment hit **\$16.7B in 2025** — up 67.9% YoY
- AI-centered real estate companies growing at **42% annualized**
- EPC's current tech stack suggests **significant efficiency capture potential**

Disclaimer: Only EPC can confirm actual revenue figures. All modeling uses conservative midpoint estimates.

Current Technology Infrastructure

Entrata PMS

Leasing, resident management, accounting, marketing, and maintenance across 16 communities. Solid mid-market platform; lacks enterprise analytics of Yardi Voyager or RealPage.

EOS Framework

Entrepreneurial Operating System for vision-setting, traction, and team health. Common among growth-stage private companies in the \$5–50M range.

Microsoft 365

Standard office productivity and communications suite — forms the ecosystem backbone for AI layer integration.

Web & Marketing

WordPress CMS, Cloudflare CDN, Google Tag Manager, Issuu digital brochures, active social media, and a custom investor portal for LP communications.

Notable Technology Gaps

- No enterprise CRM (Salesforce, HubSpot)
- No dedicated project management software (Procore, Buildertrend)
- No advanced analytics platforms
- No AI-enabled tools currently deployed

AI Foundation Assessment

Entrata provides a solid data backbone for AI integration. Its API capabilities, combined with Microsoft 365's ecosystem, create a **viable foundation for layering AI across leasing, maintenance, and financial operations** without a full platform replacement.

Active Development Pipeline — \$400M+ in Identified Projects

Project	Value	Details	Status
Wichita Ballpark District	\$110M	165-room hotel, 180 luxury apartments, 260-stall garage, 10,000 SF retail. \$11.3M TIF secured.	Financed
74 Broadway "Oberon" — Waldo, KC	\$90.3M	280 units, ground-floor retail; Brinkmann Constructors; Port KC incentives.	Active
The Rocks — Roeland Park, KS	~\$75M	280+ apartments, mixed-use; DLR Group; groundbreaking Nov 2025.	Breaking Ground
1500 Meadow Lake "Sonder KC"	\$63M	213 units; adaptive reuse of 1960s office building blended with new construction.	Active
Third & Grand — River Market	~\$62M	245 apartments, five stories; 3G Development JV; transit-oriented near streetcar.	Active
Commerce Tower — Downtown KC	TBD	355-unit LEED Gold mixed-use; adaptive reuse; 100 deposits in first 3 months.	Pre-Lease
West Bottoms Flats	TBD	265 apartments from 5 historic manufacturing buildings — 341,000 SF conversion.	Active
The Fieldston — Fairway, KS	TBD	206–210 unit active-adult luxury apartments.	Active
The Oslo — Overland Park, KS	TBD	Wellness-focused multifamily; smart technology; Ryan Companies partnership.	Active

AI-Powered Leasing & Resident Engagement Engine

Capabilities

- **24/7 AI leasing assistant** — handling prospect inquiries, tour scheduling, and qualification across all 16 communities simultaneously
- **Predictive lead scoring** — prioritizing high-conversion prospects from behavioral signals and historical patterns
- **Dynamic pricing optimization** — real-time market data, competitor comps, and seasonal demand to maximize revenue per unit
- **Automated renewal prediction** — identifying at-risk residents 90–120 days before lease expiration
- **AI-generated marketing content** — listings, social posts, and virtual tour scripts per community brand

Industry Benchmarks

- EliseAI (\$2.2B valuation): **40–50% reduction** in leasing staff workload (Forbes, 2025)
- McKinsey: AI dynamic pricing lifts multifamily NOI by **2–5%**
- NMHC: AI leasing tools deliver **27% higher** appointment-to-tour conversion

Quantified Annual Impact

2,976 units × \$1,350/mo avg rent = **\$48.2M**
gross rental revenue managed

\$964K

2% NOI lift from dynamic pricing

\$318K

15% vacancy loss reduction

Conservative Range

**\$960K–
\$1.28M**

Annual value from leasing AI alone

Predictive Maintenance & Asset Performance Intelligence

Capabilities

- **IoT sensor integration** with Entrata work order system — predict HVAC, plumbing, and appliance failures before they occur
- **AI-driven work order triage** — auto-classifying urgency, assigning optimal technicians, scheduling around resident preferences
- **CapEx forecasting** — equipment age, usage patterns, and failure probability models for 5-year planning
- **Energy consumption optimization** — AI identifies anomalies, recommends setpoint adjustments, projects utility savings
- **Vendor performance tracking** — identify underperforming contractors and negotiate better terms

Industry Benchmarks

- Deloitte: Predictive maintenance reduces costs **25–30%** and unplanned downtime **70–75%**
- JLL Technologies: AI-enabled buildings achieve **15–20%** energy cost reduction
- CBRE: Predictive maintenance properties command **3–5% rent premiums**

Quantified Annual Impact

Est. portfolio maintenance spend: ~\$1.26M | Est. annual utilities: ~\$2.4M

\$315K

25% maintenance cost reduction

\$360K

15% energy optimization savings

Conservative Range

**\$675K–
\$900K**

Annual value from predictive maintenance

Development Pro Forma & Deal Intelligence Co-Pilot

Capabilities

- **Automated pro forma generation** — AI ingests site data, zoning, comp rents, construction cost indices, and financing assumptions; draft pro formas in minutes, not days
- **Market intelligence aggregation** — continuous monitoring across KC, Wichita, SLC, Texas, and Arizona expansion markets
- **Public incentive identification** — AI scans TIF districts, Opportunity Zones, tax abatement programs, and municipal RFPs matching EPC's criteria
- **Investor reporting automation** — LP reports, distributions, and portfolio dashboards direct from Entrata
- **Monte Carlo risk modeling** — construction cost overruns, lease-up velocity, and interest rate sensitivity

Industry Benchmarks

- McKinsey: AI-enabled firms evaluate **3–5x more deals** per analyst
- Dealpath: AI reduces underwriting time by **60–70%**
- Blackstone attributes **\$200M+** annually to AI-driven real estate analytics

Quantified Annual Impact

\$480K

Incremental development fee income from
2x deal evaluation capacity

\$200–400K

10% better public incentive identification on
\$400M pipeline

\$60K

800 hours/yr analyst time automation at
\$75/hr

Conservative Range

**\$540K–
\$940K**

Construction Oversight & Project Delivery Optimization

Capabilities

- **AI-powered schedule analysis** — ingesting contractor submittals, weather data, permitting timelines, and supply chain signals to predict delays
- **Document intelligence** — extracting key terms from contracts, change orders, RFIs, and submittals; auto-flagging budget deviations
- **Change order recovery analysis** — AI identifies contractually recoverable costs frequently missed in manual review (industry avg: 2–5% of contract value left on the table)
- **AI-analyzed site photography** — comparing progress photos against BIM models and spec documents to identify deficiencies pre-punch list
- **Subcontractor performance scoring** — schedule adherence, quality metrics, and safety records for future procurement decisions

Industry Benchmarks

- CII: AI-enabled delivery reduces cost overruns **15–20%**, schedule delays **10–15%**
- TotalAI: AI takeoff tools reduce estimating time by **50–75%** at 98% accuracy
- McKinsey: AI-enabled firms reduce large-project overruns by **30–40%**

Quantified Annual Impact

\$400M active pipeline as basis

\$1.6M

EPC's 20% share of 2% cost overrun reduction on \$400M

~\$800K

EPC's share of 1% change order recovery improvement

Conservative Range

**\$480K–
\$960K**

Amortized over project lifecycle

Portfolio Analytics & Capital Markets Intelligence

Capabilities

- **Real-time portfolio dashboards** — aggregating Entrata operational data, construction progress, and financial performance into investor-facing intelligence
- **AI-powered exit timing optimization** — analyzing cap rates, interest rate trajectories, comparable transactions, and portfolio maturity for optimal disposition timing
- **Automated LP communications** — quarterly reports, distribution notices, K-1 preparation support, and personalized investor updates
- **Capital raise intelligence** — identifying and qualifying potential LP investors based on thesis alignment, ticket size, and geographic focus
- **Regulatory compliance monitoring** — 1031 exchange deadlines, Opportunity Zone requirements, and bonus depreciation eligibility tracking

Industry Benchmarks

- Juniper Square: AI investor reporting reduces GP admin burden by **40–60%**
- CAIA: GPs using AI capital markets tools raise capital **25–35% faster**
- PwC Real Estate: AI exit timing delivers **50–150 bps additional ROE**

Quantified Annual Impact

\$1M

50 bps improvement on next \$200M in exits from \$1.5B cumulative portfolio

\$160K

Accelerated capital raise on \$400M pipeline at 20% speed improvement

\$102K

1,200 hrs/yr investor relations automation at \$85/hr

Conservative Range

**\$460K–
\$1.26M**

Secondary AI Levers – Additional Annual Upside

AI-Powered Tenant Experience Platform

Chatbot for maintenance requests, community events, and resident communications across all 16 communities. 30% reduction in property management inquiry handling time.

\$180K–\$240K annually

Smart Building Energy Management

AI-optimized HVAC scheduling, lighting automation, and utility procurement across the managed portfolio. 10–15% additional utility savings beyond Lever #2.

\$240K–\$360K annually

Marketing & Brand Intelligence

AI-generated market-specific content, SEO optimization, and social media management for the EPCLiving brand across all communities and new developments. 25% marketing efficiency gain.

\$60K–\$90K annually

HR & Talent Acquisition Automation

AI screening for property management and maintenance roles – high-turnover positions in multifamily. Reduce time-to-hire by 30–40% for the positions EPC hires most frequently.

\$45K–\$75K annually

Legal & Compliance Document Review

AI analysis of lease agreements, vendor contracts, and municipal incentive applications. Faster, more thorough review reduces legal exposure and accelerates deal execution.

\$30K–\$50K annually

Combined Secondary Levers: \$555K–\$815K annually. These represent lower-complexity, faster-to-deploy opportunities that can begin generating returns within the first 60 days of the program.

Conservative Value Stack – Total Annual AI Impact

Total Annual AI Impact

\$3.67M

Conservative annual
value

\$6.16M

Optimistic annual
value

30.6%–51.3% of \$12M operating revenue

Investment & Returns

- **Investment Required:** \$350K–\$550K over 24 months
- **Payback Period:** 4–7 months
- **3-Year ROI:** 800–1,200%

❏ Excludes win-rate lift on new development pursuits, geographic expansion acceleration, and enterprise value multiple expansion from technology-enabled operations.

Phase 1: Foundation & Fast Wins — First 30 Days

01

Executive AI Immersion Workshop — Weeks 1–2

Full leadership team training covering AI fundamentals for real estate, live demonstrations of leasing AI and pro forma tools, and governance framework establishment. McKeen to serve as executive sponsor. **Investment: \$15K–\$25K.**

02

AI Leasing Assistant Pilot — 3 Communities (Weeks 2–4)

Deploy AI chatbot for prospect inquiry handling and tour scheduling at Commerce Tower, The OsLo, and one stabilized community. Full integration with Entrata leasing workflows. **Investment: \$24K–\$48K. Projected impact: \$50K–\$100K run-rate within 90 days.**

03

Baseline Data Collection & Assessment — Weeks 1–4

Audit Entrata data quality; establish KPI baselines for vacancy rates, maintenance response times, lease conversion rates, and investor reporting cycle times across all 16 communities. Identify data gaps requiring remediation before Phase 2.

04

AI Use Policy & Governance Charter — Weeks 2–3

Establish acceptable use policies, vendor evaluation criteria, data privacy protocols, and AI Steering Committee charter with McKeen as executive sponsor. Sets the compliance and oversight foundation for all subsequent phases.

Phase 2: Scale & Integrate — Days 31–90

Expansion Priorities

→ Leasing AI — All 16 Communities

Expand based on pilot results; integrate dynamic pricing into renewal workflow

→ Predictive Maintenance Pilot

Deploy on 3 largest communities; begin IoT sensor evaluation for The OsLo smart tech integration

→ Deal Intelligence Co-Pilot Launch

Automate market comp aggregation for SLC, Texas, and Arizona expansion markets

→ Investor Reporting Automation

Connect Entrata data feeds to automated LP dashboard and quarterly report generation

Governance Framework

- **AI Steering Committee:** McKeen (Chair), CFO, VP Asset Management (Natalie Gordon), external AI advisor — monthly review cadence
- **Human-in-the-Loop Mandate:** All AI-generated financial projections, investor communications, and lease pricing recommendations require human approval before execution
- **Compliance & Audit:** Quarterly AI performance audits; Fair Housing compliance review on leasing AI; data privacy protocols across KS, MO, UT, TX, AZ
- **Decision Gates:** Phase 2 expansion requires demonstrated ROI from Phase 1 pilots; each new AI deployment must show positive unit economics within 90 days

Sources & Next Steps

Research Sources

- EPC Real Estate Group website (epcrealestategroup.com); RocketReach company profile (2025); Apartments.com portfolio listings; CIENCE, ZoomInfo technology detection
- Kansas City Business Journal, Wichita Eagle (project coverage); McKinsey Global Institute — AI in Real Estate (2024); EliseAI / Forbes valuation coverage (2025)
- Deloitte — Predictive Maintenance in CRE; Construction Industry Institute (CII) — AI in Project Delivery; NMHC Technology Survey; JLL Technologies — Smart Building Report; PwC Real Estate — AI-Optimized Exit Timing

Unlocking Portfolio Value with AI

"The \$400M pipeline and 2,976-unit managed portfolio represent a compelling AI transformation opportunity — with a conservative 4–7 month payback period and 800–1,200% 3-year ROI, the question is not whether to invest in AI, but how quickly to move."

Chief AI Officer — Your Strategic Partner for Real Estate AI Adoption
