

Strategic Growth Through AI

The Global Orphan Project

Leveraging Generative AI to Scale a \$32M Mission Platform Across 27+ States and 11 Countries

PREPARED BY CHIEF AI OFFICER

CONFIDENTIAL

Company at a Glance

GO Project is a Kansas City-based faith-driven social enterprise operating three platforms — **CarePortal** (technology), **GOEX** (fair-trade apparel), and **Strong Family** (international programs) — through 2,800+ local church partners. Led by CEO Joe Knittig, the organization holds a perfect 100% Charity Navigator score and maintains a unique "Founders' Circle" model where private investors cover all overhead, ensuring 100% of orphan care donations go directly to programs.

The Opportunity

First-Mover Advantage

Faith-based child welfare organizations lag significantly in AI adoption. GO Project's existing technology DNA — CarePortal is already a real-time digital matching platform — positions it to lead the sector in AI-powered service delivery and donor engagement.

Scalability Without Proportional Overhead

CarePortal expanded from 1 Kansas county to 27+ states, but administrative functions remain largely manual. AI enables the next phase of geographic scaling without linear headcount growth.

Fundraising Efficiency Gap

With donor retention sector-wide at just 42.9% and declining, AI-driven donor intelligence, personalized engagement, and predictive analytics can dramatically improve retention and lifetime donor value — protecting GO Project's \$26.4M contribution base.

Why Act Now

▼ Donor Erosion

Overall donor retention at **42.9%** and falling. First-time donor retention at just **19.4%**. Fewer donors giving more creates dangerous concentration risk.

⚙️ Scaling Complexity

27+ state CarePortal footprint with 2,800+ church partners generates exponentially more coordination, reporting, and compliance demands — still managed with a 189-person team.

🏆 Sector Competition

1.5 million registered 501(c)(3) organizations competing for philanthropic dollars — up 85% since 2000. Larger competitors like Compassion International and World Vision have deeper operational capacity.

📋 Internal Controls Pressure

FY2023 audit flagged a significant deficiency in internal controls. Rapid 50.5% revenue growth demands automated financial oversight, not more manual processes.

📌 **AI adoption is not optional — it is a mission-critical infrastructure decision.**

AI Applications Across SG&A Functions

Finance & Accounting

Automated grant reporting · AI-powered financial close · Cash flow forecasting across multi-entity structure

\$320K–\$450K savings

Development & Fundraising

AI donor segmentation · Predictive retention modeling · Grant writing automation · Campaign A/B testing

\$1.2M–\$1.8M value

Donor & Partner Relations

AI chatbot for church partner support · Automated inquiry deflection · 24/7 donor self-service portal

\$280K–\$420K savings

HR & Talent

AI recruiting and candidate screening · Automated onboarding · Retention analytics and workforce planning

\$180K–\$260K savings

Legal & Compliance

Grant compliance monitoring · Regulatory document automation across 27+ states · Policy management

\$120K–\$180K savings

Program Operations

CarePortal matching algorithm optimization · AI-powered impact analytics · Predictive case triage for child welfare

\$700K–\$1.1M value

Consolidated Financial Impact

Function	Annual Value Range	Timeline
Finance & Accounting	\$320K – \$450K	6–12 months
Development & Fundraising	\$1.2M – \$1.8M	12–18 months
Donor & Partner Relations	\$280K – \$420K	6–9 months
HR & Talent	\$180K – \$260K	6–12 months
Legal & Compliance	\$120K – \$180K	9–15 months
Program Operations	\$700K – \$1.1M	12–24 months
TOTAL IMPACT	\$2.8M – \$4.2M	36 months

\$600K

Three-Phase Transformation Roadmap

1

Phase 1 · Days 1–90

Fast Wins

- Executive AI immersion workshop
- Donor receipting automation
- Church partner support chatbot
- CarePortal analytics dashboard
- AI governance framework

Investment: \$55K–\$85K

Value: \$120K–\$190K run-rate

2

Phase 2 · Months 4–12

Scale & Integrate

- Enterprise AI platform deployment
- Predictive donor retention modeling
- CarePortal matching optimization
- Automated compliance monitoring
- Development team AI enablement

Investment: \$185K–\$275K

Value: \$1.6M–\$2.4M run-rate

3

Phase 3 · Months 13–36

Optimize & Lead

- AI Center of Excellence
- Full program operations automation
- International monitoring AI
- Donor self-service portal
- Predictive impact analytics

Investment: \$240K–\$360K

Value: \$2.8M–\$4.2M run-rate

Risk Management

1

Fragmented Adoption

Probability: HIGH — Governance framework + AI Steering Committee + enterprise platform by Month 8.

2

Data Quality Gaps

Probability: MEDIUM-HIGH — Data readiness assessment in Phase 1. Prioritize CarePortal's existing structured data first.

3

Change Resistance

Probability: MEDIUM — "AI amplifies mission, not replaces people" messaging. Tiered training for all 189 employees.

4

Donor Trust & Privacy

Impact: HIGH — Transparent AI use policy. SOC 2 / ISO 27001 vendor requirements. No donor data used for AI training.

5

Vendor Lock-In

Probability: MEDIUM — Open APIs. Multi-vendor strategy. Data portability in all contracts.

6

Child Safety & Ethical AI

Impact: CRITICAL — Human-in-the-loop mandatory for all CarePortal case decisions. Conservative confidence thresholds. Rigorous bias testing.

Mission Impact Multiplication

Today

\$32.3M Revenue

\$5.9M Operating Surplus

125,000+ Children

Net Assets: \$17.7M

Year 3 — Post-AI

\$38M–\$42M Revenue

Organic growth + AI-enhanced fundraising

\$10.5M–\$14.5M Surplus

Current surplus + AI efficiency gains

200K–250K Children

Expanded CarePortal capacity

\$30M–\$40M Net Assets

Strengthened financial foundation

📌 **Mission Capacity Created: 60–100% more children served on just 15–25% revenue growth.** Scale CarePortal to all 50 states · Achieve financial sustainability through earned revenue · Become the sector benchmark for AI-powered nonprofit operations.

The Choice Is Clear

❌ Option A: Status Quo

- Donor erosion continues unchecked
- Internal controls strain under growth
- Manual processes limit CarePortal expansion
- Larger competitors adopt AI first

✅ Option B: AI Transformation

- \$2.8M–\$4.2M annual efficiency gains
- 60–100% more children served
- Operating surplus expansion to \$10.5M–\$14.5M
- Sector leadership in AI-powered nonprofit operations

Immediate Next Steps — Week 1

01

Day 1–3

CEO convenes leadership · Secure board endorsement · Commit to 3-year investment plan

02

Week 1

Engage AI consulting partner · Assign Phase 1 lead · Allocate \$55K–\$85K Phase 1 budget

03

Week 1–2

Organization-wide communication: AI as mission amplifier · Invite staff input

04

Week 2–4

Select Phase 1 pilots · Begin Executive Immersion training

"125,000 children served. The next 125,000 will be reached not through more people — but through smarter systems."
